

#python task 5

""#1:to check the string how many times the character is printed in th string

```
a="miles milan"
print(a.count("m"))
```

""#2:to count no of vowels in the given string and display it

```
b="miles milan"
vowels=b.count('a')+b.count('e')+b.count('i')+b.count('o')+b.count('u')
print("number of vowels:",vowels)
c=b[1:2]+b[3:4]+b[10:11]
print("the vowels are:",c)
```

""#3:write a program to get input in a string,convert into upercase and print seperate lines

```
a="india is my country"
print(a.upper())
```

""#4:define a function to accept string input and print it reverse and to fin no.of.vowels in the string

```
a=str(input("enter a string:"))
print(a[::-1])
b=a.count("a")+a.count("e")+a.count("i")+a.count("o")+a.count("u")
print("the no of vowels are:",b)
```

#5:write a program to input a sentence and print the number of characters found in the longest word of the given sentence

```
a="india is my country"
```
